

AUTOMATIC FORM, FILL & SEAL PACKAGING SYSTEMS

BY HAMER

Optional remote control
available for ease of set up
and operation

SETS NEW STANDARDS IN PACKAGING AUTOMATION, RELIABILITY AND BOTTOM LINE SAVINGS

These advanced, highly dependable packaging systems form bags from economical, continuous roll stock film, fills and seals them accurately at rates up to 18,000 bags per 8 hours. Versatility in handling various bag sizes and film thicknesses is unmatched. If desired, bags can be automatically date/shift coded. And you can count on Hamer's superb ongoing customer service support.

HAMER

Automatic Form, Fill & Seal Systems

COMPARE THESE FEATURES:

- **Labor savings and increased productivity typically equal one year investment payback.**
- **Bag cost savings of up to 20% and less storage space** with preprinted, center-fold poly film compared to pre-made, open mouth bags.
- **Corrosion-resistant, stainless steel, heavy-duty construction** for ease of cleaning and long-lasting, trouble-free service.
- **Horizontal, compact design** accommodates system location in low-overhead areas under existing equipment.
- **Choice of heat seal or tamperproof wire closures.**
- **Automatic imprinting** of date/shift code on bags is optional.
- **Design eliminates product spills and wasted bags.**
- **Remote control unit on selected models** adds convenience and saves valuable set up and changeover times.
- **Conveyor easily adjusts** to accommodate different bag sizes.
- **Microprocessor controlled systems** and operations assure reliability and consistent performance.
